

Financial Instruments Specification

Effective from the 28th of July 2018

Please note that in relation to all the below listed instruments, and effective 28th July, all your active positions and the account held with us will be in close-only mode – no new positions will be possible after that date.

TMS Europe as part of the TMS Trader service operates in NDD execution model. Albeit TMS Europe is the counterparty of each trade concluded with the client, TMS Europe is routing the execution of 100% of orders to a third party (Dom Maklerski TMS Brokers based in Poland)

Quoting instruments is based on prices received from TMS Brokers Poland and includes markups added by TMS Europe. For fixed spread instruments, the markup is included in the Targeted Transaction Spread. With regard to floating spread instruments, which in principle include a commission for TMS Europe, the quotation reflects the prices received from the Quoting Source, which may be increased by additional markup not higher than specified in the Table of Fees and Commissions.

Table 1: Specification of CFD contracts based on currencies											
Symbol	Instrument name	Nominal value of 1 lot	Pip value	Tick size	Minimum Contract Size, Lots	Max Volume in Lots	Contract Step, Lots	Targeted Transaction Spread	Reference Market	Trading hours	Quotes tolerance
EURUSD	Euro vs. US Dollar	100 000 EUR	0.0001	0.00001	0.01	30	0.01	0,00012	Price from the interbank market indicated by major institutions	From Sunday 23:00 to Friday 22:00 CET	0.0003

* Spread from 8:00 to 22:00 CET; On Friday spread from 8:00 to 21:55 CET											
** Spread from 22:00 to 8:00 CET; On Friday spread from 21:55 to 22:00 CET											
Tick size is the minimal value that the price of the quoted financial instruments can change											

An example of a transaction executed at incorrect price:

If the EURUSD rate was quoted at a given moment on the Trading Platform TMS Trader at 1.1200, and the reference price differs from the price quoted in the System Dealing with a 4,5 pips (1.12045), then the price quoted consider to be correct, but if the price on the Trading Platform TMS Trader differed from the reference price of 4,6 (1.12046) pips is then the price quoted consider to be incorrect.

Table 2: Specification of CFD contracts based on indices											
Symbol	Instrument name	Nominal value of 1 lot	Pip value	Tick size	Minimum Contract Size, Lots	Max Volume in Lots	Contract Step, Lots	Targeted Transaction Spread	Reference Market	Trading hours	Quotes tolerance

TECNICAS	Instrument, which price is based on market value of Tecnicas Reunidas SA	Price * 100 EUR	0.001	0,1 EUR	1000	20%	YES	Organized Trading	Monday – Friday 09:00 - 17:30 CET	0,3%

*1 Lot equals 100 CFD of shares

An example of a transaction executed at incorrect price:

If the price of Facebook was quoted at a given moment on the Trading Platform TMS Trader at 130.00 USD, and the reference price differs from the price quoted in the System of Dealing with more than 0.3%, or \$ 0.39, then the price quoted consider to be incorrect.

WARNING!

Equity of accounts of Clients and Related Persons on TMS Trader, may be aggregated and margins on each of the account will be blocked according to the table of margins specification from the aggregated value of Equity of all accounts.

Example:

Client	Platform	Equity
Mr X	TMS Trader Account nr 1	130 000 EUR
Mr X	TMS Trader Account nr 2	40 000 EUR
Mr X	TMS Trader Account nr 3	40 000 EUR
Aggregated all accounts equity		<u>210 000 EUR</u>

In this case, the margin rate of instruments will be charged from the equity of 210 000 EUR regardless of account number

For example for opening position on EURUSD on TMS Trader, margin rate will be 4%.

Notes of explanation

1. According to paragraph 44 of the Terms of Business the value of exposure for the purpose of Deposit Margin shall be calculated and based on the following rules:
 1. Exposure is calculated separately for each Financial Instrument.
 2. For the purpose of calculating exposure for a given Financial Instrument, and in cases where both long and short positions are held for this same Financial Instrument, the cumulated absolute value of the greater position will be taken into account.
 3. The value of the calculated exposure is then multiplied by a corresponding deposit percentage (from the tables above). Amount calculated in this way shall constitute the Deposit Margin for the given Financial Instrument.
 4. Deposit margins from individual positions in Financial Instruments are aggregated and the resulting sum is the Deposit Margin.
2. Tick size is the minimum value that the quoted price of a given Financial Instrument can change.
3. One lot is the transaction size for all of the Financial Instruments with the possibility of carrying out transactions of minimum notional value of 0.1 of one lot for Silver.,Gold. and AUDCAD., AUDCHF., AUDJPY., AUDNZD., AUDUSD., CADCHF., CADJPY., CHFJPY., CHFPLN., EURAUD., EURCAD., EURCHF., EURGBP., EURJPY., EURNOK., EURNZD., EURPLN., EURSEK., EURTRY., EURUSD., GBPAUD., GBPCAD., GBPCHF., GBPJPY., GBPNZD., GBPPLN., GBPUSD., NZDUSD., USDCAD., USDCHF., USDHKD., USDJPY., USDNOK., USDPLN., USDSEK., USDTRY. and with the possibility of carrying out transactions of minimum notional value of 0.01 of one lot for others of the Financial Instruments.
4. Standard transaction spread is the target value of spread, however the spread can change in cases listed in the Terms of Business.
5. In case of CFDs quoted on the basis of futures contracts, contract series are changed with the lapse of time. If the client is holding a position in the instrument after a change of contract series, his result will be corrected by the swap value derived from the difference between the series (the expired series and the new series).

The swap value mentioned in point 6 (above) will be adjusted by the amount of spread on a given instrument (at maximum) or by an amount lower than the spread.

For example: On the instrument OILWTI there is expiration of the base futures contract and the difference between series CLK6 and CLM6 is 100 points (K=May, M=June), where the CLM6 series is quoted higher than CLK6 (market is in *contango*). Both short and long will be subjected to a swap value correction: long positions will have a negative adjustment of 102.5 points (=100+half of spread on OILWTI) subtracted, short positions will have a positive correction of 97.5 points (=100-half of spread on OILWTI).
6. Financial costs of holding a position in a Financial Instrument by a Client are presented in the Table of Swaps Points that is available on the TMS EUROPE website. With regards to FX instruments, XAGUSD, XAUUSD and copper, US500., US30., US100., DE30., EU50., FR40., GB100., CH20., IT40., ES35. open positions are automatically rolled over to the next day. Costs/revenues from the rollover are calculated and accounted for every calendar day. The time zone used to establish end of day is CET. The swap value for US500., US30., US100., DE30., EU50., FR40., GB100., CH20., IT40., ES35. will be calculated as LIBOR 1M +/-3%.
7. Financial costs of holding a position in a Financial Instrument by a Client are presented in the Table of Swaps Points that is available on the TMS EUROPE website. With regards to FX instruments, Silver.,Gold. and AUDCAD., AUDCHF., AUDJPY., AUDNZD., AUDUSD., CADCHF., CADJPY., CHFJPY., CHFPLN., EURAUD., EURCAD., EURCHF., EURGBP., EURJPY., EURNOK., EURNZD., EURPLN., EURSEK., EURTRY., EURUSD., GBPAUD., GBPCAD., GBPCHF., GBPJPY., GBPNZD., GBPPLN., GBPUSD., NZDUSD., USDCAD., USDCHF., USDHKD., USDJPY., USDNOK., USDPLN., USDSEK., USDTRY. open positions are automatically rolled over to the next day. Costs/revenues from the rollover are calculated and accounted for every calendar day. The time zone used to establish end of day is CET. The swap value will be calculated as LIBOR 1M +/-5%.
8. In the case of US500., US30., US100., DE30., EU50., FR40., GB100., CH20., IT40., ES35. the current price quoted in the Transaction Terminal may be different from the market price by up to 0,01% of the market price per side.
9. The current value of swaps used to calculate revenues and costs from holding positions is available on the website www.tmseurope.com. On Fridays costs/revenues from holding positions are calculated and shall account for 3 days (Friday, Saturday, and Sunday).
10. In the case of equity based CFDs for the United States market the revenue/cost from the dividends will be taken into account in the swap points but it will be reduced by 30% for long positions in lieu of liquidity provider / transaction clearing costs. In the case of equity based CFDs for the German market the dividends will be reduced by 26.375%. In the case of equity based CFDs for the Spain market the dividends will be reduced by 19%. In the case of equity based CFDs for the United Kingdom market the dividends will be reduced by 10%.
11. In the Transaction Terminal the Client can place the following orders:
 - 1) Market – executed immediately at the market price,
 - 2) Limit – order is activated when current market price reaches the indicated limit price, with the exception of paragraph 36 of the Terms of Business,
 - 3) Stop – order is activated when market price reaches indicated stop level and is executed at the market Bid (sell order) or Ask (buy order), with the exception of paragraph 36 of the Terms of Business,
 - 4) Stop Loss – order with the intention of closing and open position to limit losses, is activated when market price reaches an indicated stop price,
 - 5) Take Profit – order with the intention of taking profit in an open position, activated when market price reaches an indicated take profit price.
12. Trailing Stop – Trailing Stop Loss order is activated when a defined level of profit expressed in tick size is reached. After reaching the activation price Trailing Stop works in such a way that, the Trailing Stop Loss price level is:

- a) In case of long positions – increased by the amount of tick sizes, that the market prices increased with a constant level of difference between the current price and the defined value of profit expressed in tick size. Trailing Stop Loss order will be filled when the market price drops by the defined value of profit expressed in tick size, with the exception of paragraph 36 of the Terms of Business;
 - b) In case of short positions – decreased by the amount of tick sizes, that the market prices decreased with a constant level of difference between the current price and the defined value of profit expressed in tick size. Trailing Stop Loss order will be filled when the market price rises by the defined value of profit expressed in tick size, with the exception of paragraph 36 of the Terms of Business;
 - c) Trailing Stop Loss orders are active under the condition that the user is logged into the transaction system. In case the user is logged out of the transaction system and there was a prior activation of the Trailing Stop Loss order, the order will be automatically converted into a plain Stop Loss order with the last active Trailing Stop Loss price as the stop price.
13. Stop Loss, Stop and Take Profit, Limit orders are filled at the market, at the first available price in case of a price gap or at market opening price.
 14. TMS Trader Platform is available through a TMS Trader application via mobile device after installing it on the mobile device or through a terminal installed on the Client computer.
 15. TMS EUROPE provides the services of TMS Trader through the mobile versions, subject to and in accordance with the principles stated in the Terms of Business. TMS EUROPE may extend or limit the scope of financial instruments supported by the Transaction System available through the mobile versions, and can also extend the range of transactions handled for transactions, which have been unavailable.
 16. In case of equity CFDs one lot is equal of 100 shares transaction size for all of the financial instruments with the qualification that there is possibility of carrying out transactions of minimum notional value of 0.01 of one lot.
 17. All transactions in TMS Trader are executed using the "Market" system execution at the market price.
 18. The final order execution price is the volume weighted average price, which depends on the volume of transaction, current liquidity and market depth.
 19. In the case of equity based CFDs, short selling may be restricted to a given instrument due to market conditions. Changes in the availability of short selling may be implemented on an immediate basis.
 20. In case of equity based CFDs, the Client is obliged to monitor current information regarding trading conditions, in particular information about existing swap points tables, corrections and dates of swap points connected with dividends, information regarding splits, subscription rights, etc. TMS EUROPE will be informing Clients about the necessity of individual (done by the Client) modification of awaiting orders: stop loss, take profit, limit, stop, as well as cancellation by TMS EUROPE of awaiting orders in justified conditions such as corporate actions i.e. stock split.
 21. Related Person - a client related to another Client, ascendant, descendant, sibling, spouse, parent or spouse's sibling, spouse or descendant siblings, a person remaining in an adoptive or person using the same as Client IP address of the computer or device mobile, using which transactions are concluded or the person using the same as Client device or the person who has the same as Client at least one of the addresses: residence, residence or mailing.
 22. The minimum order value on German equities amounts to EUR 100, for Spanish equities 100 EUR and for British equities 100 GBP.
 23. TMS Europe establishes the Client's maximum exposure limit, defined as a value of a Global Position Exposed to Risk at the level of:
 - 1) 50 lots – limit, will be applied with respect to the sum of following financial instruments: OILWTI, OILBRNT – in total net exposure,
 - 2) 30 lots - net limit with respect to DE30,
 - 3) 10 lots - net limit with respect to BITCOIN.

The exposure limit will be calculated as the net sum of all open long positions and short positions (for example: 20 lots of short position on OILWTI + 5 lots of long position on OILBRNT will result in net exposure at the level of 15 lots of short position).

The exposure limit will be calculated for the Client and the Related Persons, which means that TMS Europe will take into account for the calculation of all open positions in the several accounts of the Client and Related Persons.

Where the specified Client's exposure limit is exceeded, Client is obliged to effectively reduce its exposure. If the limit will be exceeded, and the Client will not reduce its exposure (despite being summoned), TMS Europe will be entitled to:

- a) refuse to execute orders to open new positions on the Client's account,
- b) prevent the Client from opening new positions in the Transaction System,
- c) close Client's existing open positions subject to the closing operation shall be executed starting from the largest position opened on Client's account; if there will be two positions of same size, the second criteria shall be the opening time of the position.
